

Immunization Handouts for Offices and Schools

For more information, visit www.voicesforvaccines.org.

Voices for Vaccines is happy to provide these downloadable and printable handouts free of charge. Feel free to distribute them in your clinics, offices, schools, community gathering places, and anywhere parents go. *Do not alter or change them in any way.* If you would like a change made or would like to request another handout be made available, please email us at info@voicesforvaccines.org.

Testimonials

- [I Was Duped by the Anti-Vaccine Movement](#). In a thoughtful and honest piece, Maranda Dynda explain why she decided to refuse vaccines for her daughter and how she changed her mind.
- [Help Me Keep My Kids Healthy](#). Sonia Green's children were born with a primary immunodeficiency, and she relies on those around her to vaccinate themselves and their children to protect her own children from vaccine-preventable diseases.
- [Colton's Battle](#). Shannon Steen thought that vaccinating was a personal choice, until her baby was hospitalized with influenza. It was then she realized how much we rely on other people to be vaccinated, too.
- [The Consequences of Refusing Vaccines](#). As an ER physician, Dr. Torree McGowan explains how diagnosing and treating an unvaccinated child is more complicated and sometimes more invasive than caring for a vaccinated child.
- [Learning Lessons from Measles](#). Two years before the measles vaccine was licensed, and right before her birthday, Beverly Barton suffered through a severe case of measles that should serve as a lesson to us all.

Informational Handouts

- [Vaccines Work!](#) Many parents have never seen the diseases for which we vaccinate. They may be amazed at how incredibly effective vaccines are at preventing these sometimes devastating diseases.
- [Vaccines Work with the Body's Natural Immune System](#). Vaccines are natural! This handout helps parents understand that vaccines help a body fend off disease the way it was designed to do.
- [Vaccine Ingredients](#). Parents are often intimidated by the ingredients in vaccines, but knowing what they are and how they work makes a huge difference.

Brochures/Flyers

- [New Parent Brochure](#). Help expectant families and new parents understand how vaccines can keep new babies safe.
- Invite parents to join VFV in [color](#) and in [black and white](#).
