

# VACCINE ADVOCACY 101

## VOICES FOR VACCINES' AUGUST MEMBER CALL

You vaccinate your kids, and you hope that others vaccinate theirs as well. **But what happens when you are confronted with anti-vaccine rhetoric?** How do you assure friends who are uncomfortable with immunization? How do you keep your community safe from the misinformation the anti-vaccine movement promotes and the disease that often follows their infiltration into your area?

Vaccine Advocacy doesn't have to be complex. VFV leader Karen Ernst will give you a few simple steps you can take to **inoculate your community against vaccine misinformation and protect your neighbors and your children from preventable disease.** She will also tackle the myths that stump you and the situations that make you uneasy.

Please join us on **Wednesday, August 6 at noon EDT (9 am Pacific)** for our conference call. This call is appropriate for everyone, from the vaccinating parents who is just realizing that an anti-vaccine movement exists to the seasoned provider who sees vaccine hesitant parents regularly.

To register for this call, you must email us at [info@voicesforvaccines.org](mailto:info@voicesforvaccines.org). Please include any myths or scenarios you'd like to see covered.
